ABSTRACT

HIV REPLICATION INHIBITING PURINE DERIVATIVES

The present invention relates to the use of a compound of formula (I) for the  
5 manufacture of a medicament for the prevention or the treatment of HIV infection  
wherein the compound of formula (I) is a compound of formula

a N-oxide, a pharmaceutically acceptable addition salt, a quaternary amine or a  
stereochemically isomeric form thereof, wherein A and B each represents a radical of  
10 formula

represents a bivalent radical of formula

15 provided that when A represents a radical of formula (a) then B represents a radical of  
formula (b) and when A represents a radical of formula (b) then B represents a radical  
of formula (a).
